

.NET Developer – student job (M/F)

Ericsson Nikola Tesla Group gathers over 3200 employees and the majority of us are from the STEM field. Besides our ICT solutions in the telecom sector we provide innovative solutions in health care, transport, state administration, municipal services and multimedia that constantly improve people's lives and create new value. With more than 70 years of experience and everlasting work on new technologies, we offer the perfect mix of new knowledge and experience.

We are software developers and engineers working on application development as a part of Ericsson Nikola Tesla's Network Intelligence and Automation team. We are looking for:
