

# Junior Software Engineer

- Do you want to build applications, which are accessible from all around the world?
- Would you like to create scalable solutions running on a “Cloud” infrastructure?
- Keen to bridge the gap, connecting legacy systems of large and established enterprises with a state-of-the-art SaaS application?
- Want to do something impactful and be part of a company that is revolutionizing the IT industry
- Do you want to work in small team and friendly teammates?
- Do you want to hang out with colleagues who love free climbing, salsa or mixing cocktails?
- You wish to have Team Lead that is easy to approach and who would help you to grow?
- Want to start with Salesforce and development? You do not have experience but you have courage?

If this sounds interesting keep reading below!

## ***About the job***

Successful candidates will have genuine passion and energy to grow within a fast-paced and fun environment, using the latest technologies in alignment with the company’s technical vision and strategy.

Salesforce is very agile and quick to implement. You often successfully complete Salesforce projects within a few months and are then ready for new tasks with new customers. When acquiring necessary (re-)certifications, we support you with training and mentoring from experienced colleagues.

We are looking for you to join our Zagreb based development team and help us in current and future projects.

## **Your Task/Responsibilities**

- Creation of technical designs based on client requirements
- Implementing frontend and backend solutions on the Salesforce.com platform using the Apex programming language and Javascript-based frontend framework
- Building integration solutions based on established EAI products, connecting Salesforce.com with further key applications (such as SAP and other ERP solutions, etc.)
- Writing technical documentation
- Execution of unit testing, general test support as well as data migration
- Work effectively individually and with team members to achieve customer satisfaction and success
- Achieve Salesforce.com certification requirements
- Salesforce Configuration

## **What you offer**

### *Required Technical and Professional Expertise*

- Bachelor or Master degree from a university with a technical specialization
- Practical experience in development using object-oriented languages such as Java or C#
- Knowing the concept of relational databases (Oracle, MS SQL, MySQL or other)
- Understanding Web-based technologies such as HTML, JS and JS frameworks
- Eager to learn new technologies and new programming languages in the area of SaaS/PaaS

### *Cultural Requirements*

- A good knowledge of English, if you know German this is a plus
- Team player who enjoys working with great team
- Confidentiality and strong sense of responsibility as well as an accurate and reliable working style in order to deliver high quality solutions
- Able to interact effectively with clients, and stay focused on clients objectives

## **What we offer**

### *Projects and career benefits*

- Challenging projects in interesting industries with well-known clients
- Support with mentoring programs for building your development expertise – from beginning to architect level
- Highly innovative Salesforce.com projects
- Opportunities to obtain salesforce.com certifications
- Large and challenging field of development
- Internal Tech Academy

### *Team benefits*

- Small team and friendly teammates
- Your team lead is easy to approach and helps you to grow
- Teamwork in an international, engaged and successful team
- High level of working independently and opportunity to influence local team development
- An open and team-oriented work culture with plenty of creative freedom

### *Salary package and other*

- Attractive salary package rewarding high performance
- Broad opportunities for career and personal development
- Health checkup
- Mobile phone and tariff

### *Life &work*

- Flexible working time and place
- Best coffee in the office
- Lots of fun team events – our events are our ideas!

*We want to put smiles on our client's faces and we know that if we put a smile on yours, we will have satisfied employee and satisfied clients*

Start Date: Autumn/Winter 2022

*Who we are:*

NTT DATA – a part of NTT Group is a leading global IT services provider and global innovation partner. We combine global presence with local market knowledge and offer professional IT services from consulting and system development to outsourcing.

*About our character:*

At NTT DATA Croatia, we understand you are not just building a career – you are building a life. We are special because of our employees: Our basic motto is that each employee has a voice. All team members are encouraged to contribute in making our daily work lives happier, more organized and more aligned with our personal values. The workplace can be shaped by all of us, but still be professional and efficient.

*What we do:*

We help clients transform through consulting, industry solutions, business process services, digital & IT modernization and managed services.

In our Competence Center Salesforce Cloud Solutions, we design business-critical processes in the areas of sales, service, marketing and their integration into the existing backend world for our customers and convert the requirements of our customers into innovative, tailor-made solutions on the Salesforce platform.
