

Java and Frontend Software Developers (M/F) - Zagreb, Split

Ericsson Nikola Tesla Group gathers over 3200 experts from the STEM field. With more than 70 years of experience and everlasting work on new technologies, we offer the perfect mix of new knowledge and experience. Our Research and Development Center is the strongest and biggest telecom R&D center in the region.

Ericsson Nikola Tesla's ICT Industry and Society team has during the years built several national digital systems covering health and land administration. Join us in the digital transformation of the industry and society. Become part of our team and work in the fast-paced environment using the latest technologies and developing your skills.

Ericsson Nikola Tesla's ICT Industry and Society team is looking for graduates and students willing to develop themselves as **Java and Frontend Software Developers**.

We are:

- using modern technologies such as Java, Angular, Spring, Docker, Kubernetes, etc.
- working on AI, AR/VR, big data, microservices, GIS, ESB on big national projects
- developing our business built upon our own ideas and solutions created through the innovative culture and regular hackathons
- developing products that target complex IT systems impacting the quality of living of us all
- have built several national digital systems covering health and land administration domains
- truly dedicated to expertise of each individual by offering stimulated and financed certification paths and courses
- working in a safe to fail environment where the latest industry methodologies and tools are the working standard
- communicating in organized, highly empowered and motivated agile/development teams

We offer:

- experience and expertise to further develop your skills applicable in any big STEM company
- annual awards in accordance with the company's business success
- incentive bonuses, including a monthly meal allowance
- company restaurant
- sports and cultural sections
- regular medical check-ups
- flexible working hours
- covered public transport costs

We expect from You:

- firm determination and commitment towards continuous learning to master own profession
- willingness to experiment, try, fail and learn from it
- desire to share achievements and knowledge to help others and address others' need

If you find yourself motivated and capable for new challenges, please feel free to apply with your CV and cover letter by using this [link](#).

Only candidates who pass the initial CV screening will be contacted.
