

Data Analyst

Data Science & Analytics Team · Zagreb, Grad Zagreb

[SofaScore](#) is a Croatian IT company that has been developing digital products of the same name at Zagreb's Vrbanj for more than 10 years. Our main products are our website and mobile apps (Android and iOS) for following sports results as they happen (*live score*). We offer not only current information to our fans, but also statistical data processing, analytics, player ratings and more. Our app is rated 4.8 on the App Store, which is the bar we're all aiming for.

The company has grown from two founders to over 140 experts, and we're constantly on the lookout for innovation and improvements, as well as developing our existing products. Now we're looking for a **Data Analyst** expert to join an existing team in collecting, organizing, and analyzing large amounts of data, using advanced tools and state-of-the-art methods.

Why is SofaScore the best choice for your next step in career growth?

In addition to a competitive salary, you have the opportunity to work in a company that has an excellent work-life balance (enjoyable number of vacation days, flexible work hours), a family benefits package, and which appreciates and rewards knowledge and progress by investing in your growth through international conferences and workshops. You will work with top quality equipment in a nicely designed office, get a company mobile phone and a MacBook Pro, paid general physical examination once a year, and numerous other benefits that we would verbally communicate to you.

What will the Senior Data Analyst take care of?

- data collection in cooperation with the development team
- proactive preparation of reports based on collected and analyzed data
- identifying business needs and assisting departments within SofaScore in defining the necessary analysis and reports
- infrastructure development in collaboration with DevOps / MLOps engineers
- mentoring a Junior Data Analyst
- cooperation with stakeholders from all of the departments within SofaScore

What characteristics will make you the best candidate?

- University degree (FER, PMF, FOI, Computer Sciences, Business Informatics, etc.)
- familiar with the tools used in data collection and analysis (ETL tools)
- excellent knowledge of SQL
- basic knowledge of Python (Numpy, Pandas, Jupyter Notebook...)
- analytical thinking and proactive approach
