

## VJEŽBA 2a. Rasprostranjanje biljaka

### Prilog 1.

*Acer platanoides* – javor mliječ, Aceraceae – javori

---

*Agrostemma githago* – kukolj, Caryophyllaceae – klinčići, karanfili

---

*Arctium minus* – mali čičak, Asteraceae – glavočike cjevnjače

***Cymbalaria muralis*** - zidni lanilist, Por. Scrophulariaceae – zijevalice

---

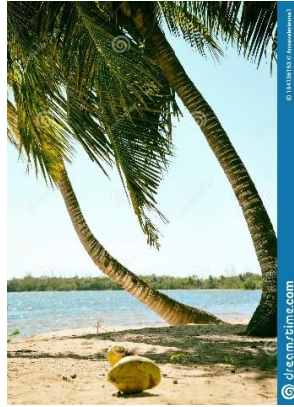

***Citrus limon*** – limun (kult.), Rutaceae – rutvice

---

***Clematis vitalba*** – pavitina, Por. Ranunculaceae

---

***Cocos nucifera*** – kokos, Por. Arecaceae

---

***Erodium cicutarium*** – kratkokljuni čapljan, Geraniaceae - iglice

---

***Eryngium campestre*** - poljski kotrljan, Por. Apiaceae – štitarke

---

***Euonymus europaeus*** – obična kurika, Por. Celastraceae – kurike

---

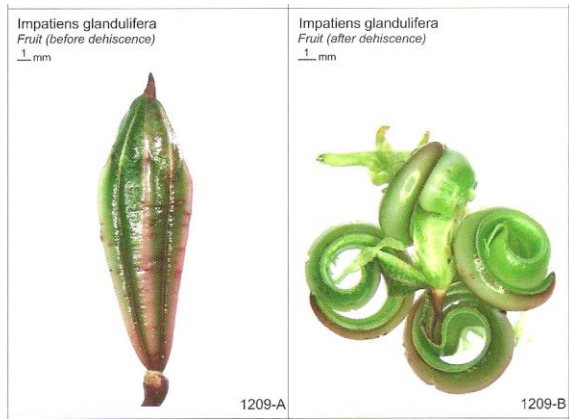

***Euphorbia lathyris*** – unakrsnolisna mlječika, Por. Euphorbiaceae - mlječike

---

***Geranium columbinum*** – golublja iglica, Geraniaceae - iglice

---

***Impatiens glandulifera*** - žljezdasti nedirak, Por. Balsaminaceae

---

***Loranthus europaeus*** - žuta imela, Por. Loranthaceae

---

***Nelumbo nucifera*** – lotos, Nelumbonaceae - lotosi

---

***Nerium oleander*** – oleandar, Por. Apocynaceae - zimzeleni

---

***Magnolia grandiflora*** – magnolija, Por. Magnoliaceae

---

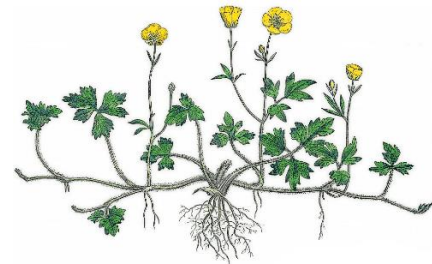

***Orlaya grandiflora*** – velevjetna moračica, Por. Apiaceae - štitarke

---

***Pisum sativum*** – grašak (kult.), Fabaceae – mahunarke

---

***Ranunculus repens*** – puzavi žabnjak, Por. Ranunculaceae

---

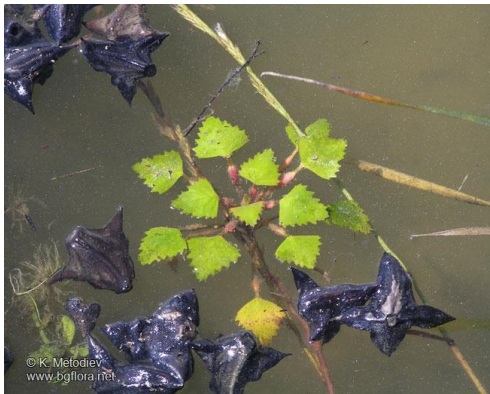

***Silene latifolia*** – širokolisna pušina, Por. Caryophyllaceae – klinčiči

---

***Tilia platyphyllos*** – veležna lipa, ljetna lipa, Tiliaceae - lipe

---

***Trapa natans*** – vodeni orašac, Trapaceae – orašci

---

***Trifolium fragiferum*** - jagodasta djetelina , Por. Fabaceae

---

***Vicia oroboides*** – žučkasta grahorica, Por. Fabaceae - mahunarke

---

***Vincetoxicum hirundinaria*** – bijela lastavina, Por. Asclepiadaceae - svilenice

---

***Viola arvensis*** – poljska ljubica, Por. Violaceae - ljubice

---

***Viscum album*** – bijela imela, Por. Loranthaceae

---
